DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4, drawn to a nucleic acid sequence, classified in class 536, subclass

23.2.

II. Claims 5-7, drawn to a nucleic acid sequence, classified in class 536, subclass

23.2.

III. Claims 8-10, drawn to a nucleic acid sequence, classified in class 536, subclass

23.2.

2. The inventions are distinct, each from the other because:

Groups I-III are drawn to nucleic acid sequences that are different in structure and function. For example, the nucleic acid sequence of each Group I-III is distinct wherein each nucleic acid sequence encodes for different proteins and hybridizes to different DNA sequences under stringent conditions.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that for the reply to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1653

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
